

WHAT IS VLISCO?

Guaranteed Dutch Wax

Fish with cola.

A disco in Vlissingen.

A flesh wound.

A company that produces granule for plastic or something like that, those company names always end with co.

A bar in Antwerp.

An ice cream, the fruity type, not a Magnum.

Something with synthetic.

Tampons.

The material where they make covers for wind instruments with like tuba's and stuff.

Cheap vodka from the Ukraine.

A brand of artificial hips.

Floss, for rhino's.

Never heard of it.

A company in Helmond that makes/sells African fabrics.

A kind of material. Something very thin but very strong, so something you could use for bulletproof vests and such.

Material like plastic or viscose.

The half-brother of rapper Sisqo. His real name is Vladimir.

An unoriginal name for a company in Vlissingen.

I think it has something to do with textile. No, I'm sure, because they collaborated with Adidas.

I would say: something you put in your hair.

Boardwax, with high dutch quality. Especially for watersports like windsurfing and bodyboarding.

Something to model your hair with.

Car wax or something?

I think it is some kind of turtle wax for boards.

Is it some sort of Vaseline?

They make Guaranteed Dutch wax. So any sort of wax; hairwax, carwax, candle wax, actually everything that contains wax.

Shoewax against rain and dirt.

Or they are the main supplier of Madame Tussauds.

Do you really want to know?
